

Repair Prompt:

“ You are an expert in Solidity smart contract vulnerability. Assume you are a senior Solidity developer.

VULNERABILITY REPORT:

{debate_output}

ORIGINAL CODE:

{original_code[:25000]}

Given the above VULNERABILITY REPORT and ORIGINAL CODE perform below tasks:

1. Fix ALL vulnerabilities mentioned in the report
2. Return ONLY the fully corrected Solidity Contract code
3. Do NOT add markdown (like ```solidity). Just the code.
4. Add comments '/// FIXED' near each change you made
5. Preserve all original functionality
6. Use modern Solidity best practices where possible

Output ONLY the complete fixed contract code: ”
